FOR IMMEDIATE RELEASE

PRESS RELEASE
March 22, 2013

Fairlight unveils PYXIS 4K – next generation professional Video Recorder

Sydney, Australia: NAB 2013 will see the release of PYXIS 4K – a new Ultra High Definition Video Recorder offering unparalleled flexibility in application and workflow compatibility.

“PYXIS 4K is the result of Fairlight’s extensive research in ground-breaking Video and Audio resolutions. It will deliver a cost effective and future proof UHD Video recording/playback solution with extensive Audio capabilities to the Broadcast, Cinema, Post Production and events industry”, commented Jean-Claude Kathriner, CEO of Fairlight.

PYXIS 4K, powered by Fairlight’s award winning Crystal Core processing engine and innovative software, records compressed or uncompressed Video formats from SD up to 4K and delivers transparent playback in up to 4K, dual-channel 2K resolution. Feature-packed PYXIS 4K records up to 96 Audio channels simultaneously, and offers up to 96 playback channels at 48K/24bit. The system seamlessly integrates in existing workflows, supporting all common 4K video file formats (DPX, DCP, MXF, JPEG 2000, XAVC), graphic formats and codecs natively.

PYXIS 4K is the ideal solution for demanding multi-screen Video wall presentations or large scale, single screen Video projections. Multiple systems can be synchronized with Fairlights proprietary inter-machine sample lock system for playback in up to 8K resolution.

PYXIS 4K is available as a standalone or rack-mountable turn-key unit, or as “PYXIS 4K.kit” with Crystal Core Media Processor to integrate into a Fairlight ratified PC, SX-20 I/O unit and appropriate software.

About Fairlight:

Fairlight is a Sydney-Australia based, leading manufacturer of professional audio with video recording, editing and mixing systems, offering desktop, console and mouse based environments. The company is at the forefront of audio IP, having received numerous Scientific and Technical Academy Awards. Fairlight is pioneering 3D sound, 8K video resolution and customized control surfaces acknowledged by industry leaders as being the fastest and most ergonomic available. www.fairlight.com.au
